

## HOME EQUIPMENT 7 – Day Kit SUPPLY LIST

The following items should be gathered and kept in a container(s) that is easy to get to in the event of an emergency or disaster. The type of container you store these items in will vary depending on how much space it takes up, your personal preference, and your ability to move the container. If one container is too heavy to carry, store the items in separate containers. In the event that you need to evacuate and go to a shelter, you need to be able to bring your supplies with you. Gather all of your items first before purchasing containers. Store your food in a separate container, if possible.
